

**NEW HORIZON
PUBLIC SCHOOL**

Presents

Our Environment

**Compiled and designed by the teachers of
New Horizon Public School**

Till now, we have heard only about the bad that is happening to our environment. Today, let us look at our environment from a slightly different angle.

**Do you think FOREST
FIRE is bad?**

Forest fires help in the natural cycle of the growth and replenishment of wood - clear dead trees, leaves and unwanted vegetation from the forest floor so that new plants can grow.

But it does a lot of good for us

- ❖ **Volcanic ash often contains minerals that are beneficial to plants.**
- ❖ **Cools the earth by removing heat from its interior.**
- ❖ **The internal heat associated with young volcanic systems has been harnessed to produce geothermal energy.**

**Are
Volcanoes
dangerous ??**

Is plastic useful to us?

It helps us create faster and more efficient vehicles.

It helps us prevent the spread of dangerous diseases with single-use medical equipments.

Now, roads are made of plastic.

Plastic composite pipes are better than metal pipes.

There are some positive things happening during this pandemic such as.....

- **People staying indoors has ultimately saved a lot of resources of energy like petrol and diesel.**

- **This has made water and air cleaner than before.**

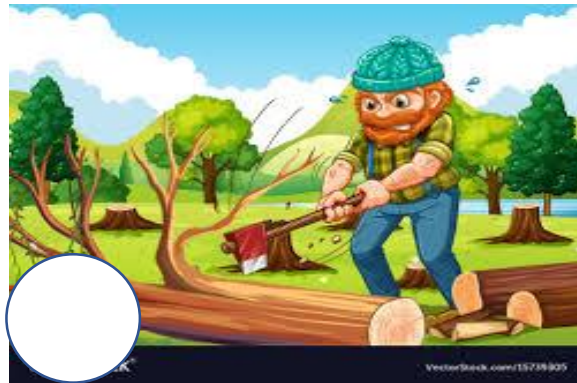

Try this!

How can we help our planet?

Colour the activity that makes our environment greener.

“ Earth provides enough to satisfy every man’s need, but not every man’s greed.”

Thank you.
